

Dressing Table & Illumination

This page is the home of the shapes that relate to the dressing table and lighting. Of course the most prominent item in this category is Royal Doulton's Pelican Dressing Table set. Pelican Dressing Table sets were made in many series, but they appear to be quite hard to find these days. This page is also the home of Lamp's, Candlesticks and Chamber Sticks. While it is never going to be the largest category, it really is quite interesting as these items are quite hard to find, and often the shapes are quite striking. A good example of this is the Dutch Candlestick. The Royal Doulton Dressing Table

Pelican Trinket Set The Pelican Trinket Set consists of a Tray, two candlesticks, a pin tray, a puff box, pomade box and a powder box. To date I have never seen an intact Trinket Set; if you have one don't split it up, do the collecting world a favour, sell it as one lot. On close inspection they appear to be 2 Dickens Ware mustard pots with the pewter work added later. These were purchased out of the US. Lamp Base - Shape 8145
