

## McHugh Shapes 36 to 148

This page covers the McHugh shapes numbered from 36 to 96A. There are many shapes missing in this range, but I am sure that some of the numbers in this sequence were never used. Between 36 and 69 there are only 4 gaps, but between 69 and 96A I only have examples of shapes. If you happen to have examples in your collection that I don't have I would love to include them; so if you can send me pictures that I can use I will gladly credit you with providing them. So click the "Read more" link to see them all.

McHugh Pottery Shapes by Shape Number  
Shape 36 to 148 Sugar Bowl Shape 36

height to top lid knob 8 cm (3.12") This sugar bowl is clearly marked 36; this is the first example I have seen of this shape. It looks to be as if the lid and the base came out of the factory as a set. I have had a collector tell me that he had a teapot marked 36. Perhaps 36 was a number issued against a tea set, would love to hear from anybody with any other examples of a 36. Vase - Shape 37

Sugar Bowl with Lid - Shape 37

Dated 1934 There are 3 variations of shape 37 - the first is a large twin handle vase. The second is a tri-handle pot which comes also with a lid. The curator of the "Erin May Collection" tells me that he has seen two examples of shape 37 with a lid. It could be argued that the lid comes from something else and that this shape does not have a lid - I will leave this argument until I have further information.

Note: There are two examples of pots marked as shape number 54, Ross says the number on the base of his is very clear. Is the mark on the base of one of these a mistake made at the time of production, I don't know. The Erin May collection has an example of this shape, but it is clearly marked as shape 90. This is an enigma, may be things will come clearer in the future (photo of shape 90 near the bottom of the page). Flower Bowl with Flower - Aid Shape 55

Dated 1934

Height 5 cm (2"), diameter 28 cm (11")

height 5 cm (2") diameter of 12.5 cm (5")  
This is a very small example of a Shape 55 float bowl and from, it is the bowl that is small, the frog is much the same size as the other examples I have seen. Candle Stick - Shape 56 26cm (10.25") tall base diameter of 15.5 cm (6.2")

Candle Stick - Shape 57

One of these was listed on eBay some time ago,

it was a candle holder with a handle for carrying it Have you got an example of this Shape?

Vase - Shape 76

height 9 cm (3.5") & 14 cm (5.5") diameterThis is a very interesting example, note the ribbed strap handles, this is the only example I have seen of this style of decoration on McHugh pottery. This style of decoration comes up on John Campbell Pottery, but not McHugh.

## Vase - Shape 90

height 25 cm (10") tall The vase held by the Erin May Collection leaves us with a conundrum, it is clearly marked 90 to the base, but it is the same shape and size as the shape 54 that Ross & Sharron Pentreath provided the details (see photo under shape 54). Deco Handle Pitcher - 96A

height 25 cm (10") The example have pictured here does not have a shape number, but Paul McHugh tells me that he has an example fo this shape and that it is clearly marked 96A Vase - Shape 98

Vase - Shape A

8 cm (3.12") tall - diameter of 12.5 cm (5") This is the only example I have seen of this shape, it appears to be a variation of Shape 18, it is clearly marked to the base as a Shape A.
