The image above shows the Elegent Vegetable dish without its lid so the ladle is visible. To dat thios is the only example of a Royal Doulton Ladle I have seen, this came out of the factory as a set. Elegent is my name for this shape, if anybody knows Royal Doulton name or shape number please let me know as I prefer to use the factory names & numbers. I use both the term Covered Vegetable dish and Tureen, Tureen is the more poular term in use, but these dishes are in fact covered vegetable dishes. Soup tureens would need to be much bigger than these.
