

We buy ceramics

I am always on the look out for good quality stock. We pay top prices for items in our field of expertise. I specialize in twentieth century British Ceramics, especially Royal Doulton, Carlton Ware, Royal Winton, Clarice Cliff and Beswick. I am also right into Australian Pottery; I have buyers for most styles of Australian pottery looking to buy now. I also carry Amphora and Noritake. Generally we only buy pottery and china in our field, but there are other styles and maker's that I am happy to carry that I have not mentioned here so if you think I may be interested give me a call on (03) 9332 3883 or 0422 751 721. If it is not something we deal in I have many contacts within the industry and I happy to put you on to reputable dealers or auction houses that will be of service.

We also sell on consignment and are actively looking for collections to market by interactive exhibition
