

## Earthen Ware Vases

Nothing looks better than a collection, like the nine vases shape 7012 pictured below. A vase on its own is nice, two is a pair and three is a collection and as collectors are all too aware it is that third purchase that can lead to all sorts of problems.

On page 103 and 104 of Volume one of Royal Doulton Series Ware, Louise Irvine shows 79 different Earthen Ware Vase shapes. At present we have photos of 83 shapes and at least a third of these are not on Louise Irvine's list. Going by this I believe there are at least 120 vase shapes. I believe this list is just past half complete.

Shape 8301 12.5 cm (5") tall Vase Shape Unknown I ????? approx. 10 cm (4") tall I know of at least 4 examples of the above

shape, it is quite unusual shape as it has a large hollow in the base and it is quite heavy for its size. I am not sure, but

may be it is a Pot Pori holder and it is meant to have some sort of cover. I will leave it amongst the vases until I can work

it out. If you know what this is or have an example with a shape number I would like to hear from you.
