

Bone China Shapes

There are no resources that I am aware of regarding Royal Doulton Bone china shapes. I would really like to include the numbers that Doulton attributed to the shapes, but unless these numbers are written on the base there is no way of knowing them. As there are no names and in a lot of cases no shape numbers I am going to take the opportunity to give the various vases names. Here's the rule, all names given by Nicholnack will be in italic with parenthesis, any names or numbers attributed by Royal Doulton will be in bold. We will begin with shapes in numerical order where I know the shape number. I know this is a very small beginning, but at least it is a beginning.

Bone China Vases Shapes

R.D. Bone China Vase Shape 767 production era 1905 to 1932 - shape number impressed height 14.5 cm (5.75") R.D. Bone China Vase Shape 1028 production era 1905 to 1932 R.D. Bone China Vase Shape 1032 production era 1905 to 1932 - shape number impressed height 17.5 cm (7")
