

Dickens Vase Shapes

Of all the series Dickens Ware was one of the most prolific, so it almost goes without saying that there are almost innumerable vase shapes and sizes in this pattern. It is my hope that as this list grows we can get some idea of what shapes were available and in what era. In the Dickens Ware Vase fact file I have photographs 55 vase shapes and sizes; for 53 of these vase shapes we have been able to identify by the Royal Doulton issued shape number. Hit the [More...](#) tab to see the complete range of vases.

Loving Cup

Vase Shape Unknown ????

Mr Micawber (era 1908 to 1931)

approx. 10 cm (4") tall I know of at least 4 examples of the above shape, it is quite unusual shape as it has a large hollow in the base and it is quite heavy for its size. I am not sure, but may be it is a Pot Pourri holder and it is meant to have some sort of cover. I will leave it amongst the vases until I can work it out. If you know what this is or have an example with a shape number I would like to hear from you.
